

Phase 1: I/O, Conditionals, and Absolute Basics

These problems focus on reading inputs correctly, basic arithmetic, and simple if/else logic.

#	Problem Name	Core Concept
1	Watermelon (4A)	Modulo and logic
2	Way Too Long Words (71A)	String length and indexing
3	Team (231A)	Basic counting
4	Next Round (158A)	Array iteration and conditionals
5	Bit++ (282A)	String parsing and variables
6	Domino piling (50A)	Basic geometry/math
7	Beautiful Matrix (263A)	2D Arrays and absolute differences
8	Bear and Big Brother (791A)	While loops
9	Elephant (617A)	Division and ceiling logic
10	Soldier and Bananas (546A)	Arithmetic progressions
11	Word (59A)	Character case counting
12	Wrong Subtraction (977A)	Digit manipulation
13	Nearly Lucky Number (110A)	Frequency counting
14	Anton and Danik (734A)	String traversal
15	Translation (41A)	String reversal/comparison

#	Problem Name	Core Concept
16	Tram (116A)	Running sums and maximums
17	Vanya and Fence (677A)	Threshold checking
18	Beautiful Year (271A)	Digit extraction and uniqueness
19	In Search of an Easy Problem (1030A)	Boolean flags
20	George and Accommodation (467A)	Pair comparisons

Phase 2: Loops, Arrays, and String Manipulation

This phase introduces frequency maps, array sorting, and slightly more involved string operations.

#	Problem Name	Core Concept
21	Magnets (344A)	State changes in arrays
22	Calculate Function (486A)	Math patterns ($O(1)$ complexity)
23	Hulk (705A)	Pattern generation
24	Is your horseshoe on the other hoof? (228A)	Unique elements (Sets)
25	Ultra-Fast Mathematician (61A)	String mutation / XOR
26	Drinks (200B)	Float precision and averages
27	Divisibility Problem (1328A)	Modulo arithmetic optimization
28	I Wanna Be the Guy (469A)	Set unions
29	Hit the Lottery (996A)	Greedy approach (Coin change)

#	Problem Name	Core Concept
30	Presents (136A)	Index mapping/inversion
31	Anton and Letters (443A)	Parsing raw strings
32	Arrival of the General (144A)	Finding min/max indices
33	Insomnia cure (148A)	Multiples and overlapping sets
34	Amusing Joke (141A)	Anagrams and frequency arrays
35	Pangram (520A)	Alphabet checking
36	Fox And Snake (510A)	2D Grid pattern printing
37	Candies and Two Sisters (1335A)	Basic combinatorics
38	Sum of Round Numbers (1352A)	Base 10 decomposition
39	Police Recruits (427A)	Running balances
40	Mishka and Game (703A)	Tallying scores

Phase 3: Frequencies and Math Primitives

Here, you will learn to spot edge cases and optimize basic math so you don't hit Time Limit Exceeded (TLE) errors.

#	Problem Name	Core Concept
41	Petya and Strings (112A)	Lexicographical comparison
42	Helpful Maths (339A)	Parsing and sorting
43	Word Capitalization (281A)	ASCII manipulation

#	Problem Name	Core Concept
44	Boy or Girl (236A)	Distinct character counting
45	Stones on the Table (266A)	Adjacent element checking
46	Vasya the Hipster (581A)	Minimums and remainders
47	New Year and Hurry (750A)	Accumulator loops
48	Restoring Three Numbers (1154A)	Algebraic deduction
49	Yet Another Two Integers Problem (1409A)	Floor division
50	Holiday Of Equality (758A)	Target matching
51	Design Tutorial: Learn from Math (472A)	Composite numbers
52	Buy a Shovel (732A)	Modular loops
53	Soft Drinking (151A)	Multi-variable limiting factors
54	The New Year: Meeting Friends (723A)	Medians / Sorting
55	I_love_%username% (155A)	Historical min/max tracking
56	Choosing Teams (432A)	Grouping and capacities
57	Polycarp and Coins (1551A)	Modulo balancing
58	Short Substrings (1367A)	String reconstruction
59	Dislike of Threes (1560A)	Generating valid sequences
60	Minutes Before the New Year (1283A)	Time conversion

Phase 4: Greedy and Logic Fundamentals

These problems often look complicated but have a simple $O(N)$ or $O(1)$ mathematical trick to solve them.

#	Problem Name	Core Concept
61	Minimal Square (1360A)	Geometry logic
62	Honest Coach (1360B)	Sorting and adjacent differences
63	Brain's Photos (707A)	2D Array flag triggers
64	Even Array (1367B)	Parity matching and swapping
65	Two Arrays And Swaps (1353B)	Greedy maximization
66	Panoramix's Prediction (80A)	Prime generation/checking
67	Vanya and Cubes (492A)	Sum of sums
68	Fafa and his Company (935A)	Divisors
69	Sereja and Dima (381A)	Two-pointer technique
70	Required Remainder (1374A)	Math formulation
71	Maximum in Table (509A)	2D Prefix sums
72	Bachgold Problem (749A)	Greedy prime sums
73	Team Olympiad (490A)	Multiple array tracking
74	Do Not Be Distracted! (1520A)	Contiguous sequence validation
75	Remove Smallest (1399A)	Sorting and gaps
76	Plus One on the Subset (1624A)	Min/Max extraction

#	Problem Name	Core Concept
77	Borze (32B)	Custom decoding
78	Spy Detected! (1512A)	Identifying outliers
79	Black Square (431A)	Key-value mapping
80	Boring Apartments (1433A)	Digit series summing

Phase 5: Implementation and Contest Readiness

The final 20 are modern 800-rated problems from recent contests. They require combining loops, conditionals, and math seamlessly.

#	Problem Name	Core Concept
81	Marathon (1692A)	Value comparisons
82	Yes or Yes? (1703A)	Case insensitivity
83	A+B? (1772A)	Simple parsing
84	Spell Check (1722A)	Exact string matching / Permutations
85	Codeforces Checking (1791A)	Substring presence
86	Following Directions (1791B)	Coordinate geometry / Grids
87	Prepend and Append (1791C)	Two-pointer shrinking
88	Grab the Candies (1807B)	Evens vs Odds splitting
89	Blank Space (1829B)	Maximum contiguous subarrays
90	Love Story (1829A)	Hamming distance

#	Problem Name	Core Concept
91	Ten Words of Wisdom (1850B)	Constrained maximums
92	Word on the Paper (1850C)	2D Grid scanning
93	To My Critics (1850A)	Sum of top two elements
94	Medium Number (1760A)	Finding the median of three
95	Atilla's Favorite Problem (1762A)	Alphabet indexing
96	Advantage (1760C)	Top two maximums
97	Odd One Out (1928A)	XOR logic / Unique detection
98	Can I Square? (1915C)	Perfect square validation
99	Vlad and the Best of Five (1926A)	Majority element
100	Vlad and Shapes (1926B)	2D Geometry recognition

101	16B - Burglar and Matches	102	34B - Sale		
103	44A - Indian Summer	104	96A - Football		
105	318A - Even Odds	106	337A - Puzzles		
107	405A - Gravity Flip	108	451A - Game With Sticks		

#		Problem Name	Core Concept		
109	474A - Keyboard	110	556A - Case of the Zeros and Ones		
111	580A - Kefa and First Steps	112	133A - HQ9+		
113	208A - Dubstep	114	149A - Business trip		
115	160A - Twins	116	313A - Ilya and Bank Account		
117	1475A - Odd Divisor	118	1475B - New Year's Number		
119	1374B - Multiply by 2, divide by 6	120	1343A - Candies		
121	1294A - Collecting Coins	122	1337A - Ichihime and Triangle		
123	1433C - Dominant Piranha	124	1559A - Mocha and Math

983	1700B - Palindromic Numbers	984	1701B - Permutation	
985	1702C - Train and Queries	986	1703G - Good Key, Bad Key	
987	1704B - Luke is a Foodie	988	1705B - Mark the Dust Sweeper	
989	1706B - Making Towers	990	1708B - Difference of GCDs	
991	1709B - Also Try Minecraft	992	1711B - Party	
993	1712C - Sort Zero	994	1713B - Optimal Reduction	
995	1714G - Path Prefixes	996	1715B - Mathematical Circus	
997	1717B - Madoka and Underground Competitions	998	1719B - Mathematical Circus	
999	1720B - Interesting Sum	1000	1721B - Deadly Laser	
1001	1722G - Even-Odd XOR	1002	1726B - Mainak and Interesting Sequence	
1003	1728B - Best Permutation	1004	1729C - Jumping on Tiles	
1005	1730B - Meeting on the Line	1006	1731B - Kill Demodogs	
1007	1733B - Rule of League	1008	1734C - Removing Smallest Multiples	

#	Problem Name	Core Concept		
1009	1735B - Tea with Tangerines	1010	1736B - Playing with GCD	
1011	1738B - Prefix Sum Addicts	1012	1739B - Array Recovery	
1013	1740B - Jumbo Extra Cheese 2	1014	1741C - Minimize the Thickness	
1015	1742H - Data Structures	1016	1743C - Save the Magazines	
1017	1744C - Traffic Light	1018	1746B - Rebellion	
1019	1747B - BAN BAN	1020	1748B - Diverse Substrings	
1021	1749B - Death's Blessing	1022	1750B - Maximum Substring	
1023	1753A1 - Make Nonzero Sum (easy)	1024	1754B - Kevin and Permutation	
1025	1758B - XOR = Average	1026	1759C - Thermostat	
1027	1760G - SlavicG's Favorite Problem	1028	1761B - Elimination of a Ring	
1029	1762B - Make Array Good	1030	1763B - Incinerate	
1031	1764B - Doremy's Perfect Math Class	1032	1765M - Minimum LCM	
1033	1766B - Notepad#	1034	1767B - Block Towers	
1035	1768B - Quick Sort	1036	1770A - Two Towers	
1037	1771B - Hossam and Friends	1038	1772E - Permutation Game	
1039	1774B - Coloring	1040	1775B - The Forbidden Permutation	
1041	1777B - Emordnilap	1042	1778B - The Forbidden Permutation	
1043	1779B - MKnez's ConstructiveForces	1044	1780B - GCD Partition	
1045	1781B - Going to the Cinema	1046	1783B - Matrix of Differences	
1047	1784A - Monsters (easy version)	1048	1786B - Stand-up Comedian	
1049	1788B - Sum of Two Numbers	1050	1789B - Serval and Inversion Magic	
1051	1790D - Matryoshkas	1052	1791G2 - Teleporters (Hard Version)	
1053	1792B - Stand-up Comedian	1054	1793C - Dora and Search	
1055	1794C - Scoring Subsequences	1056	1795B - Ideal Point	
1057	1796B - Asterisk-Minor Template	1058	1797B - Li Hua and Pattern	

#	Problem Name	Core Concept		
1059	1798B - Three Sevens	1060	1799B - Equalize by Divide	
1061	1800C1 - Powering the Hero (easy)	1062	1801A - The Very Beautiful Blanket	
1063	1802B - Settlement of Guinea Pigs	1064	1804B - Vaccination	
1065	1805B - The String Has a Target	1066	1806B - Mex Master	
1067	1807G2 - Subsequence Addition (Hard)	1068	1808B - Playing in a Casino	
1069	1809B - Points on Plane	1070	1810B - Candies	
1071	1811C - Restore the Array	1072	1814A - Coins	
1073	1816B - Grid Reconstruction	1074	1818B - Indivisible	
1075	1820B - JoJo's Incredible Adventures	1076	1821B - Sort the Subarray	
1077	1822C - Bun Lover	1078	1823B - Sort with Step	
1079	1824A - LuoTianyi and the Show	1080	1826B - Lunatic Never Content	
1081	1827A - Counting Orders	1082	1829F - Forever Winter	
1083	1831B - Array merging	1084	1832B - Maximum Sum	
1085	1833C - Vlad Building Beautiful Array	1086	1834B - Maximum Strength	
1087	1836B - Astrophysicists	1088	1837C - Best Binary String	
1089	1838B - Minimize Permutation Subarrays	1090	1839B - Lamps	
1091	1840D - Wooden Toy Festival	1092	1841B - Keep it Beautiful	
1093	1842B - Tenzing and Books	1094	1843C - Sum in Binary Tree	
1095	1844B - Permutations & Primes	1096	1845B - Come Together	
1097	1846C - Rudolf and the Another Competition	1098	1847B - Hamon Odyssey	
1099	1848B - Vika and the Bridge	1100	1849B - Monsters
